

Air Products Express (APEX) Services

Fast, flexible industrial nitrogen services (INS) for a range of pipeline applications

Flexibility to meet your needs

- Wide range of flow rates
- Pressures from 0 to 10,000 psig
- Temperatures from -320°F to $+800^{\circ}\text{F}$
- Storage to meet your requirements

When you need fast, flexible nitrogen supply for product displacements, line drying, pressure testing or maintenance purging, count on Air Products' APEX Industrial Nitrogen Services. We operate and maintain our own vast pipeline network, so we understand the issues. APEX nitrogen supply can save you time and money while providing an environmentally friendly way to meet your pipeline needs.

Benefit from APEX nitrogen know-how

- **Custom-engineered service:** With more than 35 years' experience in supporting pipeline operations, we focus our technical expertise on meeting your specific goals and requirements.
- **Proprietary computer modeling:** Our sophisticated system accurately predicts nitrogen volumes, back pressures, barrel count, line pressures, etc., reflecting dynamic changes due to elevation, inventory levels and product conditions. We use this information to determine and deliver the most cost-effective nitrogen supply for your needs.
- **Exceptional reliability:** We manufacture our own nitrogen at strategically located facilities throughout the U.S., so you can count on reliable supply.
- **Quick commitment:** Call our dedicated APEX hotline—1-800-APEXGAS—24/7 to get a timely assessment and fast supply commitment.
- **Rapid response:** Our nationwide fleet of mobile pumping units can respond quickly to unexpected requirements.
- **Fast set-up— with no infrastructure or capital investment:** Our self-contained pumping units arrive ready to hook up and start working. Our operators set up the equipment to supply the flow rates, pressures and temperatures for your job—and parameters can be adjusted quickly and easily.

Adaptable to your application

- **Product displacement:** Whether you use nitrogen for pig pushing or running inspection tools, count on APEX Services for the consistent pressures and high reliability you need to get the job done.
- **Pressure testing:** Our mobile pumping units provide pressures up to 10,000 psig, with overpressure protection and line safeties sized for your job—so you can take advantage of this environmentally friendly alternative to hydrostatic testing.
- **Drying and inerting:** Our high-flow-rate hot nitrogen can reduce drying time and final dew points by as much as 70 percent over other methods—saving you time with new lines, before and after maintenance and before product conversions. Air Products guarantees a dew point of -90°F or lower.
